

Recent results from BESII

Xiaoyan Shen
for BES Collaboration

Institute of High Energy Physics, Chinese Academy of Sciences, Beijing 100049, China

Based on the data samples collected at BESII, recent results on the light hadron spectroscopy are reported, which include the observation of $Y(2175)$ in $J/\psi \rightarrow \eta\phi f_0(980)$ and the partial wave analysis of $J/\psi \rightarrow \gamma\phi\phi$. Results on the $\psi(2S)$ and $\psi(3770)$ decays are reported too. We also mention the status of BESIII/BEPCII.
