

## Recent results from VES experiment

V.Nikolaenko<sup>(a)</sup>, VES collaboration

<sup>(a)</sup> IHEP Protvino, Russia

A short review of recent and ongoing studies concerning light scalar mesons with the VES setup is given. Among them the search for  $a_0 \leftrightarrow f_0$  transition in  $f_1 \rightarrow 3\pi$  and  $\pi(1800) \rightarrow \eta\pi\pi$  decays, and OZI rule violation in  $J^P = 0^+$  charge exchange production by pions.
